Therasuit Intensive Programs a Big Hit!

Wonderful changes in postural stability, balance, head control, and coordination are happening!!

Comments from one of our clients with autism: "It feels great" . . . "It gives me a tight body."

The Therasuit helped his muscle tone, and body feedback kicked in to help him move more efficiently.

Food Impacts On The Brain!!!

Is your child struggling with concentration issues? Learning and behavioral problems? These problems can be related to food and nutrition!!! We have seen this with the children we work with at SCC for years! Now we are excited to have Mark Norman, a nutritionist, come on site twice a month for consultations with families. He has many years experience and does a great job identifying simple things that can be done, added to diet, or taken out of the diet to help set up better brain power!! Call to set up a consultation! He is very reasonably priced. (651) 769-5444 or email him at mknorman2003@yahoo.com.

Parent Corner

The Power of the Ear

See improvements in speech and language, calm state, balance, eye/hand coordination, to name a few! This can be done in home programs or done at Special Children Center with our auditory interventions! We now offer many different programs and can help identify which program matches your child's needs the best. Call and talk to Nancy Lawton-Shirley if interested.
